Heat Pump Pad™

8in The Heat Pump Pad™

Provides an effective base for heat pump equipment installed in snowy climates. Rather than a combination of a typical 2in (or 3in) equipment pad and 6in. heat pump risers, the Heat Pump Pad™ provides a full 8in of elevation in a simple square footprint. The star pattern of the integral risers allows for installation of equipment with different size footprints up to 36in X 36in. Also included are eight anti-vibration pads uniquely designed to fit into the guide slots on the top of the integral risers. The base is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode. Nestable for efficient shipping, transportation, and warehousing. Injection molded from concrete gray, recycled polypropylene material, the Heat Pump Pad™ is environmentally friendly and designed to last longer than the equipment it supports. US Patent Number 7,891,635, and other patent(s) pending.

Catalog No.	Description	UOM	Order Multiple	List Price
HP3232-8	Heat Pump Pad™ 32in x 32in x 8in	EA	16	\$109.68
HP3636-8	Heat Pump Pad™ 36in x 36in x 8in	EA	16	\$133.64
